Hi J - just to keep you in the loop - spoke to my manager about the situation and he is going to see what we can do about the missed trading opportunity so I will keep you posted on that.

3:56 PM

ok great. I bought at a higher price because of it and so far it's been a loss as well lol

Hi J - just reached out to my engineering team again to see if there is a possibility. As of now, it doesnt look like its possible as we have no other loans on the platform with the functionality, however, I wont take it as a hard no until they tell me that. I will revert back shortly when they respond.

The list that I received when we spoke this morning (after you told me the liquidation) showed it. The list I received last night did not reflect the liquidation, however, like I stated last night the recommendation was to have the collateral in order to not get liquidated. I could never confirm that it was not going to happen but on the preliminary list we received when we spoke, I looked up the loan ID and did not see it.

They can't say that the Blockfi system was running 100% or even 50% efficiently yesterday. I tried to call the support line as well to get help and make sure everything was OK.

You did that with me the entire day. We were on top on things. What failed was blockfi's system. We did what we were supposed to do. I trusted that Blockfi would do the right thing and honor your credibility as their employee to validate that we did everything right and what was needed. I hope to get better news tomorrow and that you still back me up on what happened.
